Work Experience

December 2007- Present
Nokia
Mountain View, California
Senior Release Engineer
Ovi Tools

- Build master, Windows install programmer and source code repository administrator (CVS/SVN) for the Ovi Tools group within the CONNECT division at Nokia. Responsibilities include:
 - Maintain and enhance custom automated software build systems for multiple projects simultaneously.
 - Design, develop and maintain internationalized InstallShield projects for the Ovi Files product with several OEM-branded versions.
 - Administer and maintain the CVS and SVN source code repository systems.
 - Administer and maintain the MSDN and ADC subscriptions.
 - Administer intra-group discussion groups / mailing lists using both Microsoft Exchange and a custom in-house solution.

August 2005 - December 2007
Avvenu
Palo Alto, California
Build & Release Engineer

-
- Build master, install programmer and CVS administrator for a mobile networking/file-sharing startup. Responsibilities included:
 - Maintain and enhance the custom automated software build system.
 - Design, develop and maintain internationalized InstallShield projects for the main product with several OEM branded versions.
 - Administer and maintain the CVS source code repository system.
 - Administer and maintain the MSDN subscription and CD library.
 - Promoted to Senior Release Engineer upon acquisition of Avvenu by Nokia in December 2007 (see Senior Release Engineer position above).

August 2004 — August 2005
GHR Systems / Loansoft
Berkeley, California
Configuration Manager

-
- Build master and network administrator for a mortgage point-of-sale software company. Responsibilities included:
 - Develop and maintain a set of lender-specific virtual servers for development and QA testing.
 - Develop and maintain a custom automated product build system for the .NET online application, and perform product builds using this system.
 - Maintain the legacy desktop build system and perform client-specific builds on demand, using WISE InstallMaster.
 - Administer and maintain the SourceSafe source code repository projects.
 - Administer and maintain the MSDN subscription and CD library.
 - Act as the de facto network administrator/IT specialist for the office, providing desktop and server support as needed.

1999 - Present
MousePlanet, Inc
Anaheim, California
Systems Engineer & Staff Writer

-
- Responsibilities include:
 - Administration and maintenance of the vBulletin-based discussion board system.
 - General Web site maintenance including both user-visible and backend components.
 - Post-publication proofreading and corrections as needed.
 - Writing occasional articles and weekly news updates.
